

Parag Sharma

Solo Founder • Full-Stack AI Product Builder

✉ sharmaparag2004@gmail.com 📞 +91-93502 08607 📍 Ambala, Haryana
🌐 linkedin.com/in/p09s 🐙 GitHub 🌐 milakya.vercel.app 🌐 daivam.vercel.app

Solo founder who shipped two live AI products independently — owning strategy, design, engineering, and go-to-market from day one. International award-winner. Former lead organiser of two national hackathons for 400+ participants. Known for moving fast and building things people actually use.

Products Built

MilakYa [BETA • GOOGLE PLAY]

May 2026 – Present

Bilingual household-item tracker for India • milakya.vercel.app

Next.js • TypeScript • Supabase • Groq AI • Vercel • Android

- Spotted a real gap in the Indian market — people juggling multiple homes (PG, parents', in-laws', storage unit) have no easy way to track which belongings are where. Built the full solution solo and shipped it to Android; 12-person closed beta is live, public launch imminent.
- Built AI photo and diary scanning as the core feature: users photograph a shelf or handwritten list and the app reads, names, and organises their items by room. No manual entry required.
- Handled all branding and growth solo — designed the logo, coined the tagline “Apna Saman, Apni Jagah” (Your stuff, its place), ran the Instagram go-to-market campaign, and shipped paid-tier infrastructure (usage-based scan limits, subscription logic) ready to monetise from day one.

Daivam AI [LIVE • PRODUCTION]

Jan 2026 – Present

AI-powered Vedic astrology platform • daivam.vercel.app

Next.js • Supabase • Groq AI • LangChain

- Built and launched a live AI platform where users get personalised Vedic readings — birth charts and partner compatibility — through a conversational AI, with SEO and vernacular keyword targeting baked in for Indian search traffic. Designed, built, and deployed entirely solo.

Leadership & Experience

Community Lead & Organiser — GDG on Campus

Sep 2024 – Jul 2025

Google Developer Groups • Mullana, Haryana

- Organised two national student hackathons (GDG Hackureka, GDG Hacks) — coordinated **400+ participants, 150+ teams**, and owned all logistics, sponsorships, and judging end-to-end.
- Designed and taught a hands-on AI curriculum (Vertex AI, Gemini APIs) to **150+ students**; managed sponsor relationships and grew the campus developer community from scratch.

AI Associate Intern

May – Jun 2024

TriColor Initiatives Pvt. Ltd. • Panchkula, Haryana

- Worked with the Salesforce platform — CRM setup, automation workflows, and Einstein AI for sales forecasting and enterprise analytics.

Notable Projects

Silent Voice — Real-Time Sign Language Interpreter

Oct – Dec 2024

Taiwan Ministry of Digital Affairs • Good Idea Award Winner • \$40,000 NT

Python • OpenCV • MediaPipe

- Built a real-time interpreter that converts hand gestures (ASL) into spoken words, running at 30+ FPS on a standard laptop with no internet required. Won an international competition against global submissions.

RepoSage — AI Codebase Intelligence

Mar – Apr 2026

Ask any question about a GitHub codebase in plain English

LangChain • ChromaDB • HuggingFace • Groq • Streamlit

- AI assistant that reads an entire GitHub repo and lets engineers query the code in plain English — great for onboarding or reviewing unfamiliar projects. Deployed publicly with private repo support.

Recognition & Awards

Taiwan MoDA Good Idea Award — \$40,000 NT prize, international competition

Nov 2024

Top 5 / 3,000+ teams — Google Hack4Change national challenge

Aug 2024

National Innovation Award — Runner-Up, NIA'24

Nov 2024

2nd Runner-Up — Ideathon 2025

Feb 2025

Co-authored Patent — USSD-based offline UPI payment layer for feature phones

Dec 2025

Technical Skills

Product / Fullstack Next.js 14, TypeScript, React, Tailwind CSS, Supabase, Vercel, PWA / TWA (Android)

AI / GenAI Groq API, LangChain LCEL, RAG, ChromaDB, FAISS, HuggingFace Transformers, Prompt Engineering

ML / CV Scikit-learn, TensorFlow, OpenCV, MediaPipe, XGBoost, NumPy, Pandas

Languages Python, TypeScript / JavaScript, C++, SQL

Education

B.Tech, Computer Science & Engineering • CGPA: 8.05

May 2026

Maharishi Markandeshwar (Deemed To Be University) • Mullana, Haryana

- **Certifications:** ML Specialization — Andrew Ng, Stanford / DeepLearning.AI (Sep 2023) • Salesforce AI Associate (Jun 2024)
